

Computer Organization and Architecture Tutorials

Extracted and Published by: Master Zenrade

Last Updated : 14 Apr, 2021

[Recent Articles on Computer Organisation](#)

Topics :

- [Basic Computer Instructions](#)
- [Instruction Design and Format](#)
- [Computer Arithmetic](#)
- [Microprogrammed Control](#)
- [Memory Organization](#)

- [Input and Output Systems](#)
- [Pipelining](#)
- [Miscellaneous](#)
- [Programs](#)
- [Quick Links](#)

Basic Computer Instructions :

1. [A simple understanding of Computer](#)
2. [Issues in Computer Design](#)
3. [Computer System Level Hierarchy](#)
4. [Computer Architecture and Computer Organization](#)
5. [Basic Computer Instructions](#)
6. [Timing diagram of MOV Instruction in Microprocessor](#)
7. [Assembly language and High level language](#)
8. [Addressing Modes](#)
9. [Memory based Vs Register based addressing modes](#)
10. [Von Neumann architecture](#)
11. [Harvard Architecture](#)
12. [Interaction of a Program with Hardware](#)
13. [Simplified Instructional Computer \(SIC\)](#)
14. [Instruction Set used in simplified instructional Computer \(SIC\)](#)
15. [Instruction Set used in SIC/XE](#)
16. [RISC and CISC](#)

17. [RISC and CISC | Set 2](#)
18. [Vector processor classification](#)
19. [Essential Registers for Instruction Execution](#)
20. [Single Accumulator based CPU organization](#)
21. [Stack based CPU Organization](#)
22. [General Register based CPU Organization](#)
23. [Data Transfer instructions in AVR microcontroller](#)
24. [Arithmetic instructions in AVR microcontroller](#)
25. [Conditional Branch Instructions in AVR Microcontroller](#)
26. [CALL Instructions and Stack in AVR Microcontroller](#)
27. [Branch Instructions in AVR Microcontroller](#)
28. [Logical Instructions in AVR Microcontroller](#)
29. [Data Manipulation Instructions](#)
30. [Machine Control Instruction](#)
31. [Very Long Instruction Word \(VLIW\) Architecture](#)

Instruction Design and Format :

1. [Different Instruction Cycles](#)
2. [Essential Registers for Instruction Execution](#)
3. [Machine Instructions](#)
4. [Instruction Formats \(Zero, One, Two and Three Address Instruction\)](#)
5. [2-address instruction and 1-address instructions](#)
6. [3-address instruction and 0-address instruction](#)
7. [3-address instruction and 2-address instructions](#)
8. [Register content and Flag status after Instructions](#)
9. [Debugging a machine level program](#)
10. [Vector Instruction Format](#)
11. [Vector instruction types](#)
12. [Branch Prediction in Pentium](#)
13. [Instruction Word Size](#)
14. [>> Problem Solving on Instruction Format](#)

Computer Arithmetic :

1. [Computer Arithmetic | ALU and Data Path](#)
2. [Computer Arithmetic | Set 1](#)
3. [Computer Arithmetic | Set 2](#)
4. [Difference between 1's complement and 2's complement](#)
5. [Restoring Division Algorithm For Unsigned Integer](#)
6. [Non-Restoring Division For Unsigned Integer](#)
7. [Booth's Algorithm](#)

8. [Overflow in Arithmetic Addition](#)
9. [How the negative numbers are stored in memory?](#)
10. [Conventional Computing vs Quantum Computing](#)

[>> Quiz on Number Representation](#)

Microprogrammed Control :

1. [Micro-Operation](#)
2. [Microarchitecture and Instruction Set Architecture](#)

[Types of Program Control Instructions](#)

3. [Difference between CALL and JUMP instructions](#)
4. [Hardwired v/s Micro-programmed Control Unit](#)
5. [Implementation of Micro Instructions Sequencer](#)
6. [Performance of Computer](#)
7. [Control Unit and design](#)
8. [Horizontal micro-programmed Vs Vertical micro-programmed control unit](#)
9. [Comparisons between Hardwired Vs Micro-programmed Control unit](#)
10. [Computer Organization | Subprogram and its characteristics](#)

Memory Organization :

1. [Introduction to memory and memory units](#)
2. [Memory Hierarchy Design and its Characteristics](#)
3. [Difference between Byte Addressable Memory and Word Addressable Memory](#)
4. [Difference between Simultaneous and Hierarchical Access Memory Organisations](#)
5. [Register Allocation](#)
6. [Cache Memory](#)
7. [Cache Organization | Set 1 \(Introduction\)](#)
8. [Multilevel Cache Organisation](#)
9. [Locality and Cache friendly code](#)
10. [Locality of Reference and Cache Operation](#)
11. [Amdahl's law and its proof](#)
12. [Subroutine, Subroutine nesting and Stack memory](#)
13. [RAM vs ROM](#)
14. [What's difference between CPU Cache and TLB?](#)

15. [Different Types of RAM](#)
16. [Types of computer memory \(RAM and ROM\)](#)
17. [Secondary memory – Hard disk drive](#)
18. [Introduction to solid-state drive \(SSD\)](#)
19. [Read and Write operations in memory](#)
20. [2D and 2.5D Memory organization](#)

Input and Output Systems :

1. [Priority Interrupts | \(S/W Polling and Daisy Chaining\)](#)
2. [I/O Interface \(Interrupt and DMA Mode\)](#)
3. [Direct memory access with DMA controller 8257/8237](#)
4. [Asynchronous input output synchronization](#)
5. [Programmable peripheral interface 8255](#)
6. [Interface 8255 with 8085 microprocessor for 1's and 2's complement of a number](#)
7. [8255 \(programmable peripheral interface\)](#)
8. [Microcomputer system](#)
9. [Working of 8085-based Single board microcomputer](#)
10. [Interface 8254 PIT with 8085 microprocessor](#)
11. [Synchronous Data Transfer](#)
12. [Input-Output Processor](#)
13. [MPU Communication](#)
14. [Memory mapped I/O and Isolated I/O](#)
15. [BUS Arbitration](#)

Pipelining :

1. [Instruction Level Parallelism](#)
2. [Execution, Stages and Throughput](#)
3. [Types and Stalling](#)
4. [Dependencies and Data Hazard](#)

IEEE Number Standards

1. [IEEE Standard 754 Floating Point Numbers](#)

Miscellaneous :

1. [Microprocessor](#)
2. [Microprocessor | Externally Initiated Operations](#)
3. [Bus organization of 8085 microprocessor](#)

4. [Generations of computer](#)
5. [Intel x86 evolution and main features](#)
6. [Memory Banking](#)
7. [Introduction to quantum computing](#)
8. [Conventional Computing vs Quantum Computing](#)
9. [Rethinking binary with Quantum computers](#)
10. [Flynn's taxonomy](#)
11. [Clusters In Computer Organisation](#)
12. [Parallel processing – systolic arrays](#)
13. [8259 PIC Microprocessor](#)
14. [Block Diagram of 8259 Microprocessor](#)
15. [Microprocessor | 8251 USART](#)
16. [Evolution of Microprocessors](#)
17. [Human – Computer interaction through the ages](#)
18. [Computer Ports](#)
19. [Introduction to Parallel Computing](#)
20. [Hardware architecture \(parallel computing\)](#)
21. [Computer Architecture | Multiprocessor and Multicomputer](#)
22. [Timing diagram of INR M](#)
